

A stylized map of the Eastern Seaboard of the United States. The landmasses are shown in a light tan color against a blue background representing the ocean. A thick, bright green line traces the coastline from the northern tip of Maine down to the southern tip of Florida, representing the 'Eastern Seaboard Greenway'. The text 'Linking cities and towns between Maine and Florida' is overlaid on the right side of the map in white, sans-serif font.

Linking cities and towns

Dispelling a rumor . . .

2016 State of the Greenway

Spine Route

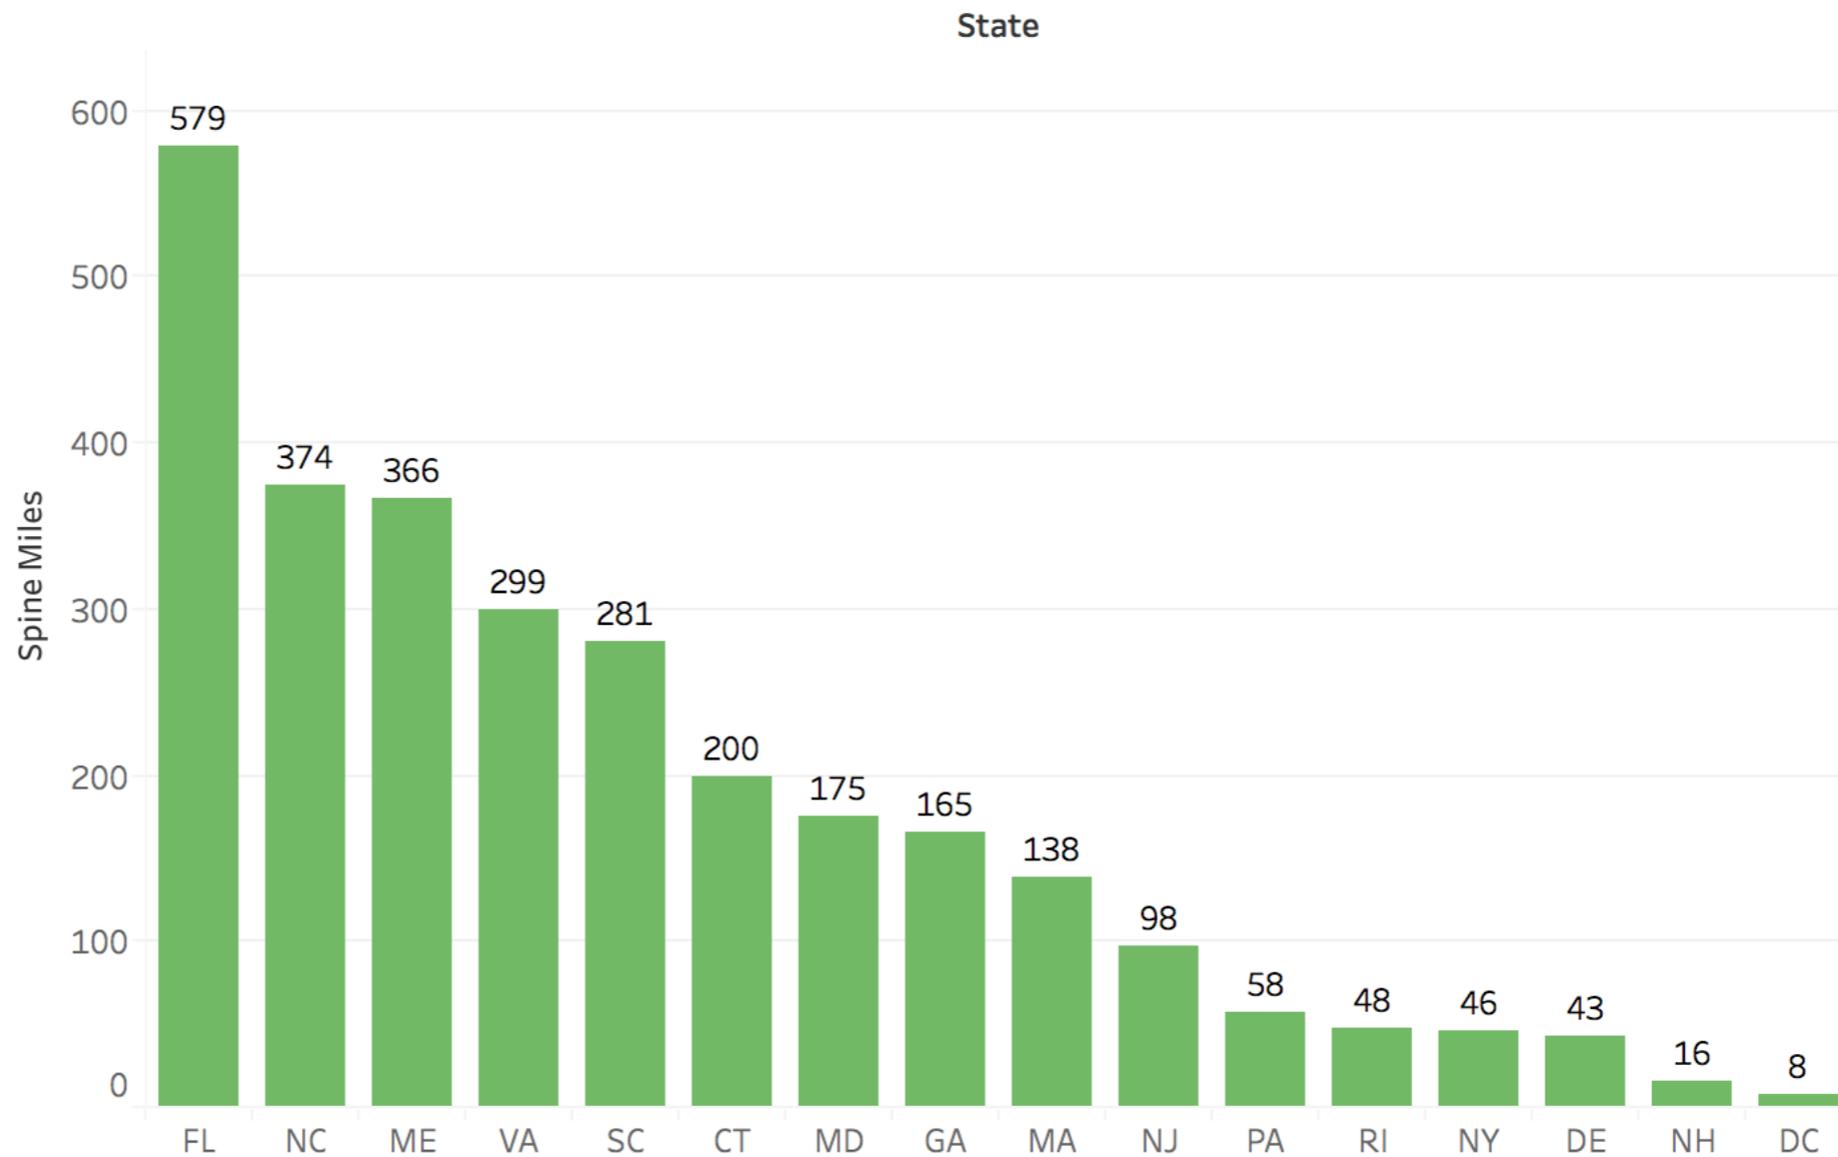

Total miles: 2,882 miles

- **1,273 miles are marked (44%)**
- **895 miles are complete (31%)**
- **+450 under development (17%)**
- **+700 route sought (gap) (25%)**

How long will the ECG be in each state?

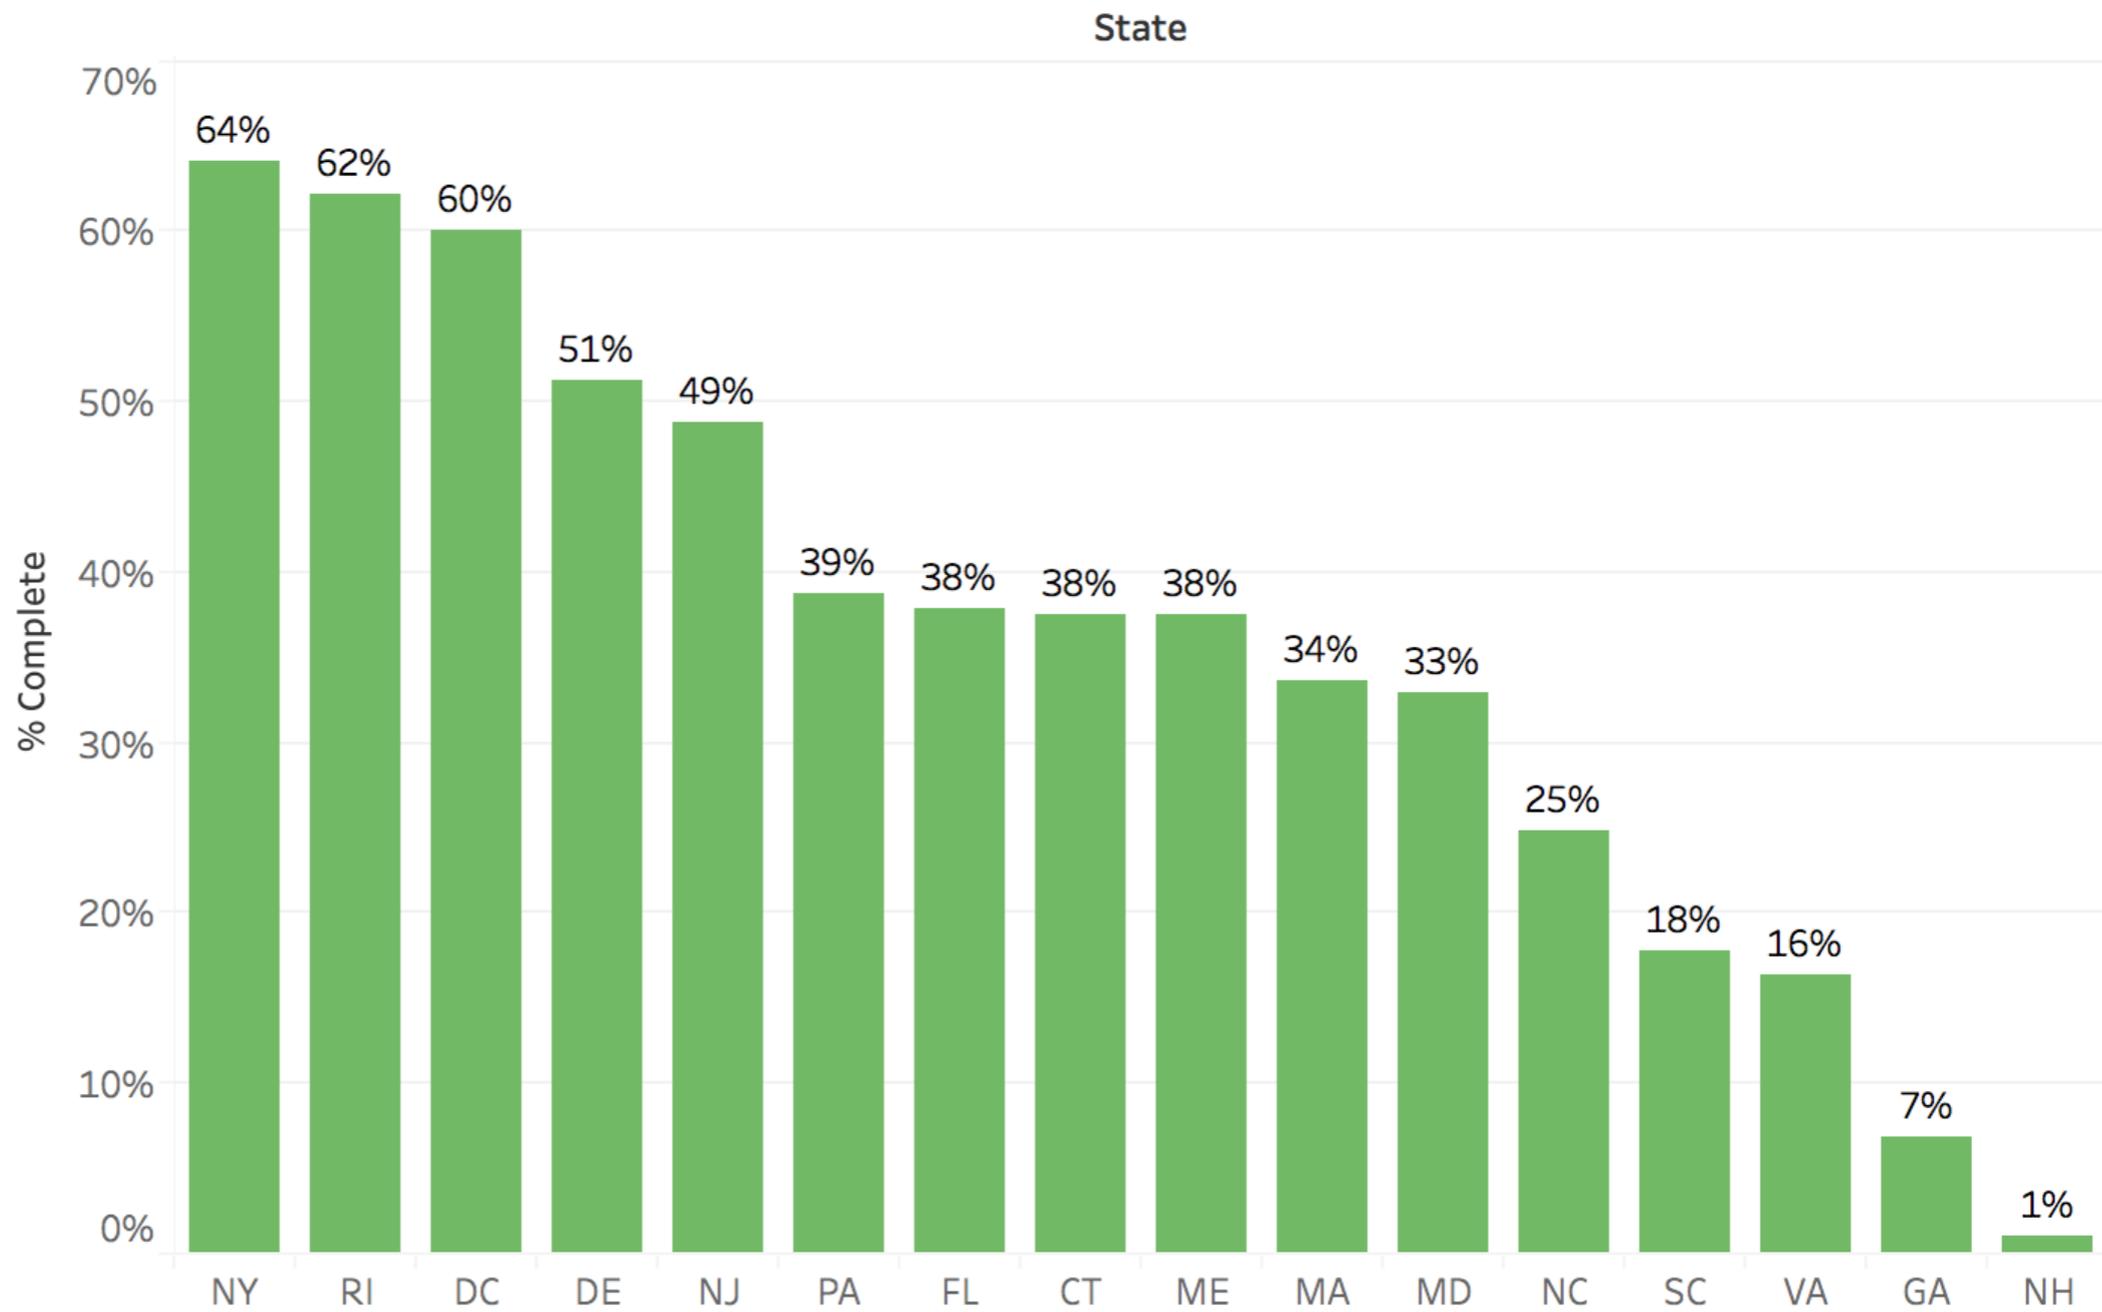

Total miles per State

Percentage complete by State

% Complete by State

Multi-variable metric to measure progress

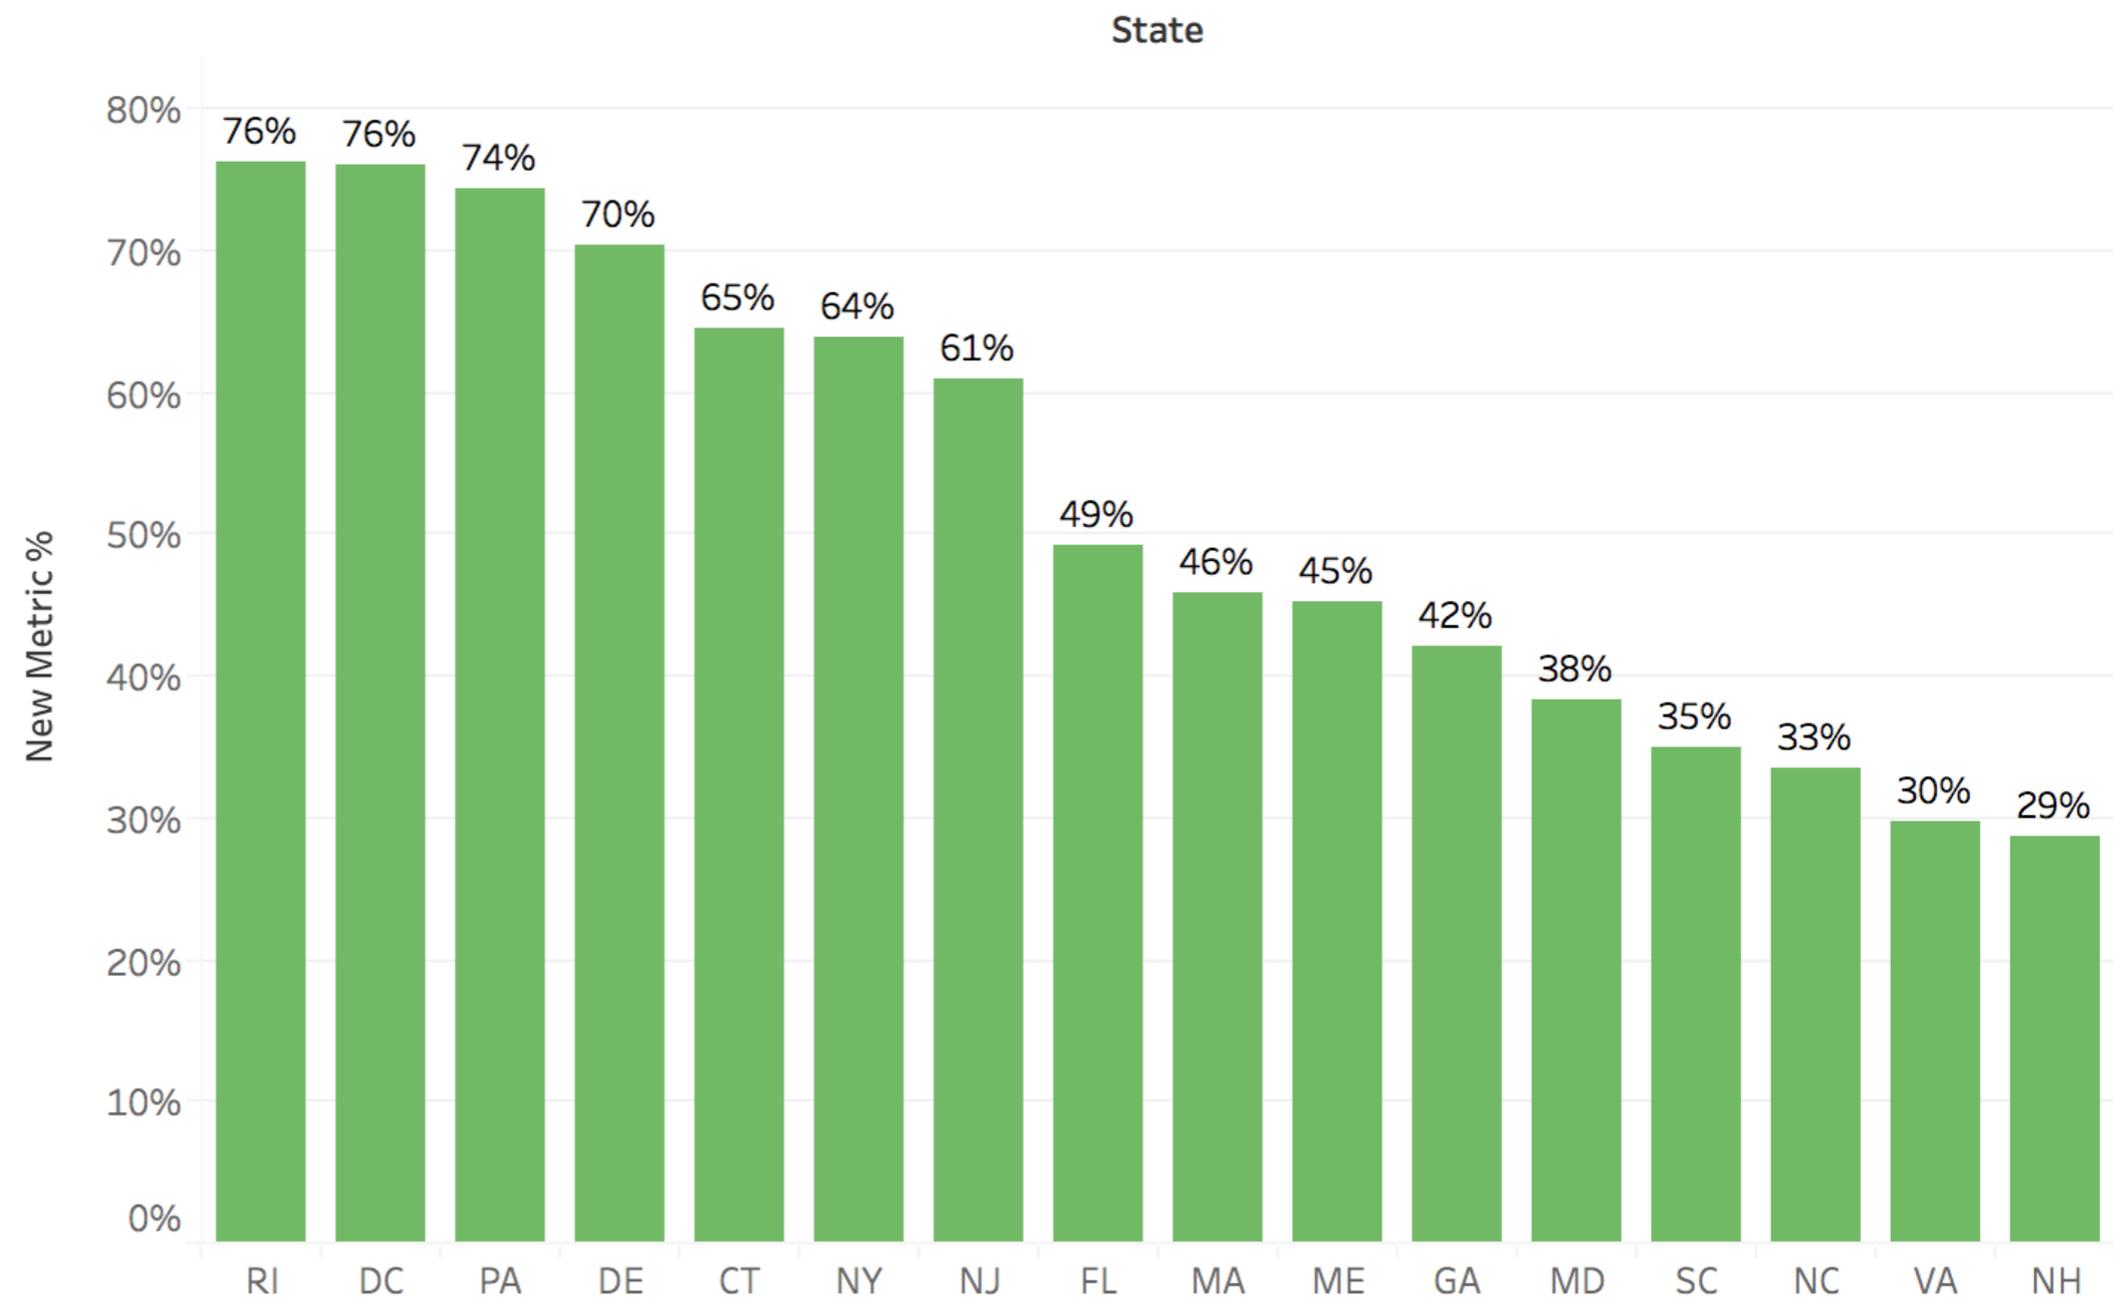

1. Identifying the alignment
2. Getting alignment in public control
3. Project included in comprehensive plan
4. Project moves into design
5. Project moves into construction
6. Cut the ribbon & designate

New measurement of progress

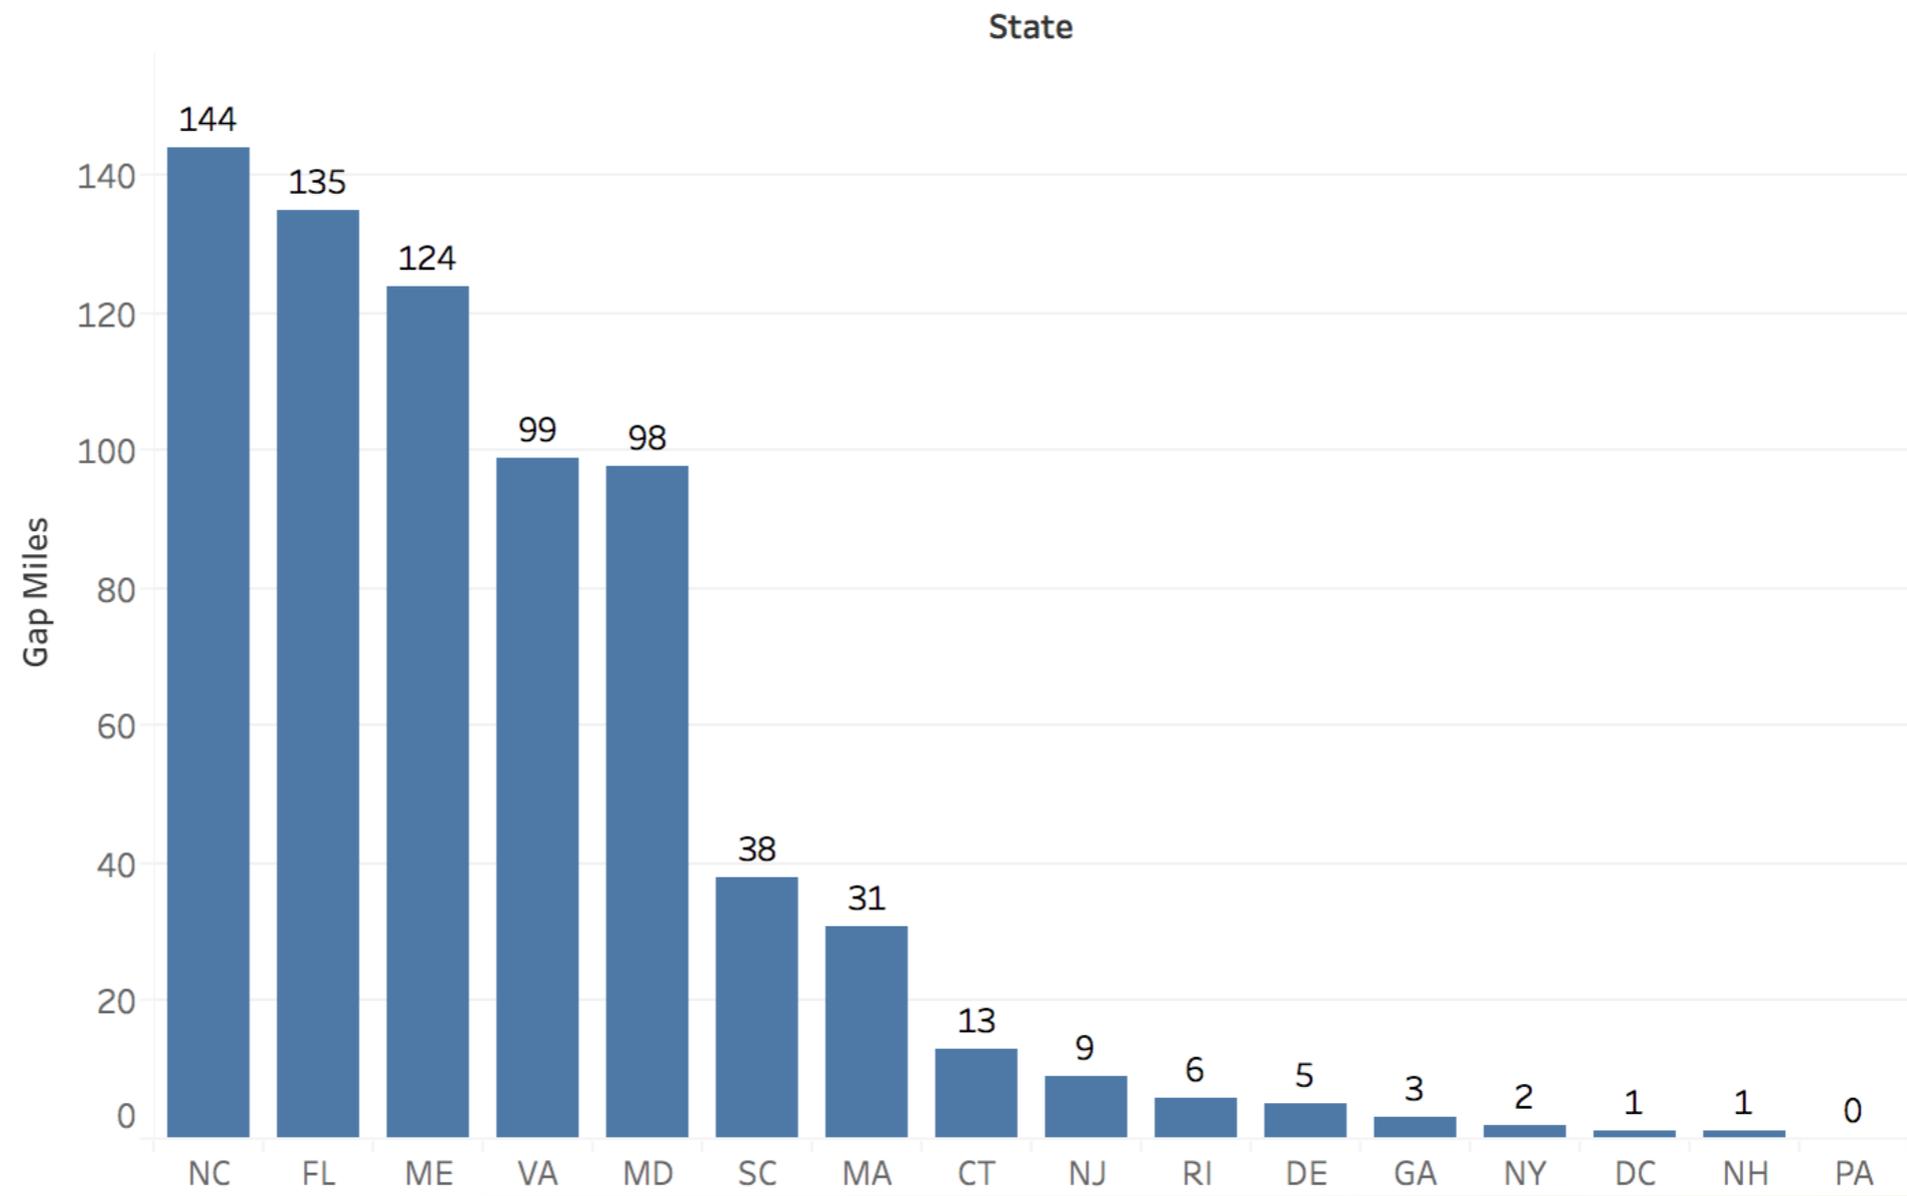

New Metric % by State

Gap Opportunity

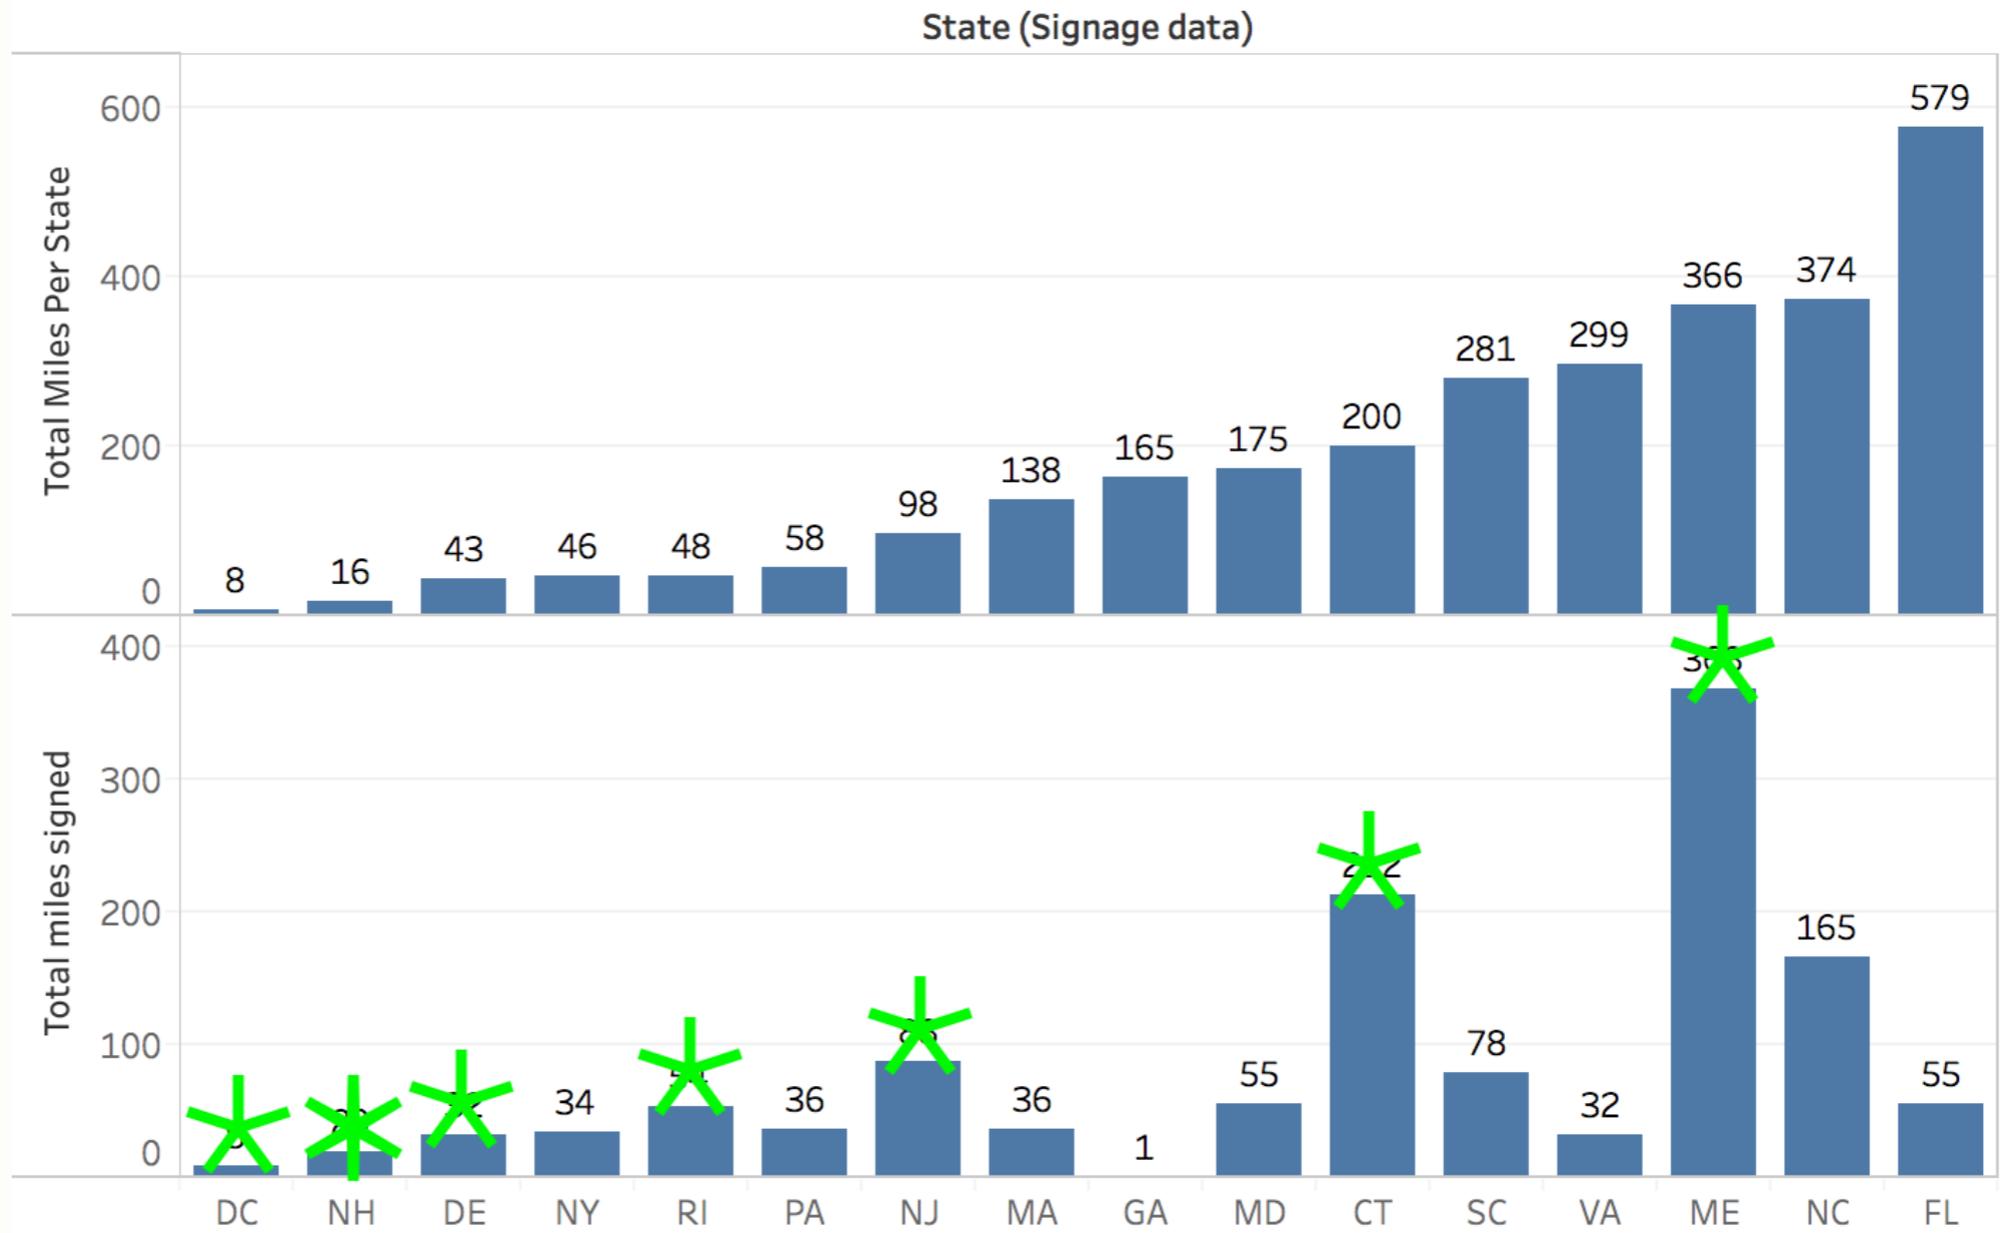

Gap Miles by State

Strategic Plan Goal: Fully signed by 2020

Comparing signed vs total length

Strategic Plan Goal: 200 additional miles by 2020

2016 Designations (including in progress)
