Connecting people to place:

About the East Coast Greenway

The East Coast Greenway is a walking and biking route stretching 3,000 miles from Maine to Florida, connecting our nation's most populated corridor. The East Coast Greenway is designed to transform the 15 states and 450 communities it connects through active and healthy lifestyles, sustainable transportation, community engagement, climate resilience, tourism, and more. The Greenway offers a safe place for bicyclists, walkers, runners, and more — of all ages and abilities — to commute, exercise, and explore new destinations.

The nonprofit East Coast Greenway Alliance leads the development of the trail network by working with partners from the local to federal level.
